What Is This?

Your busiest timeslots fill first, like a Saturday evening class. You can charge more for those slots and keep your normal price for the rest. Customers who want the busy slot pay a little more, and quieter slots stay good value.

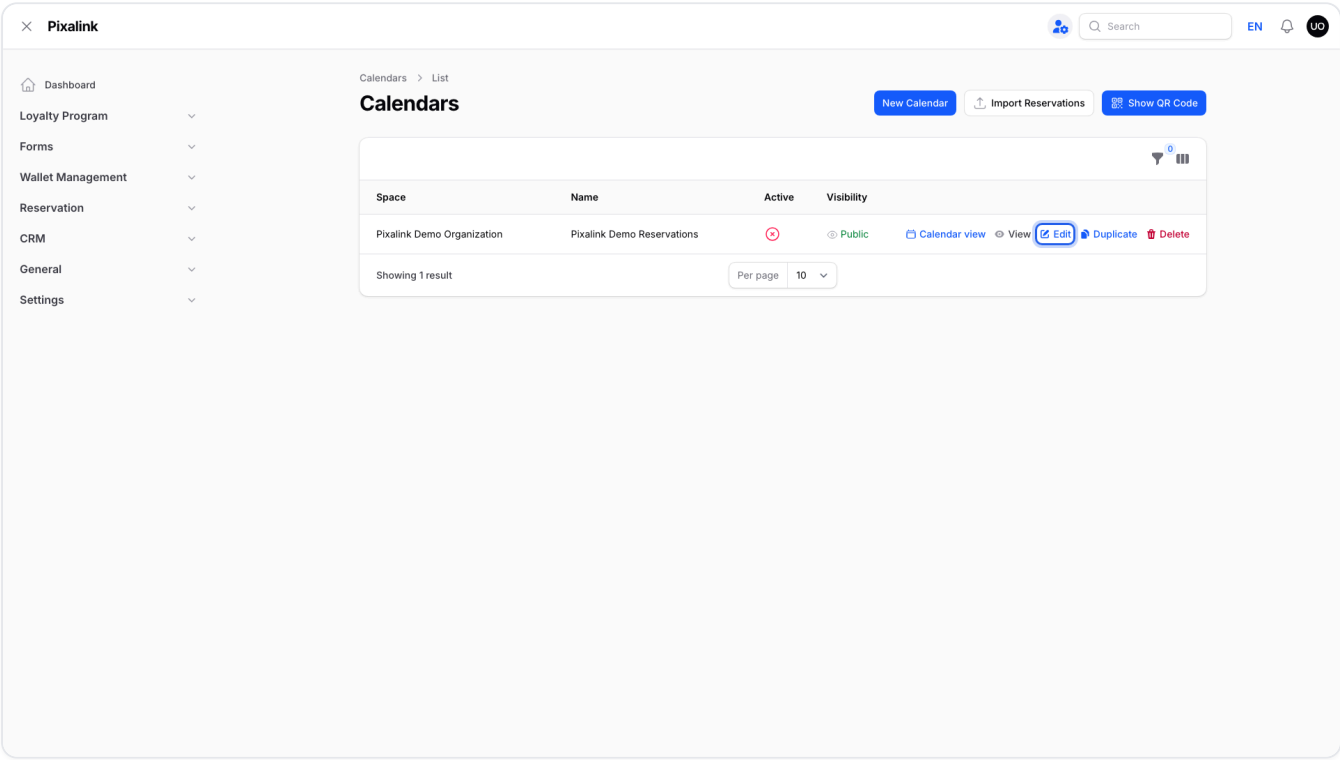

This page is for calendars that already take payment. To start charging for bookings, see How to Set Up Payment for Calendar Reservations (https://kb.pixalink.io/articles/how-to-set-up-payment-for-calendar-reservations).

Real-Life Example

Priya runs a Pilates studio in Petaling Jaya and charges RM35 a class. Her Thursday 4 PM class was always full, with a waiting list. She opened the Thursday 4 PM slot and set a **Custom Price** of RM50. Every other slot stayed at RM35. Each booking in that slot now brings in RM15 more.

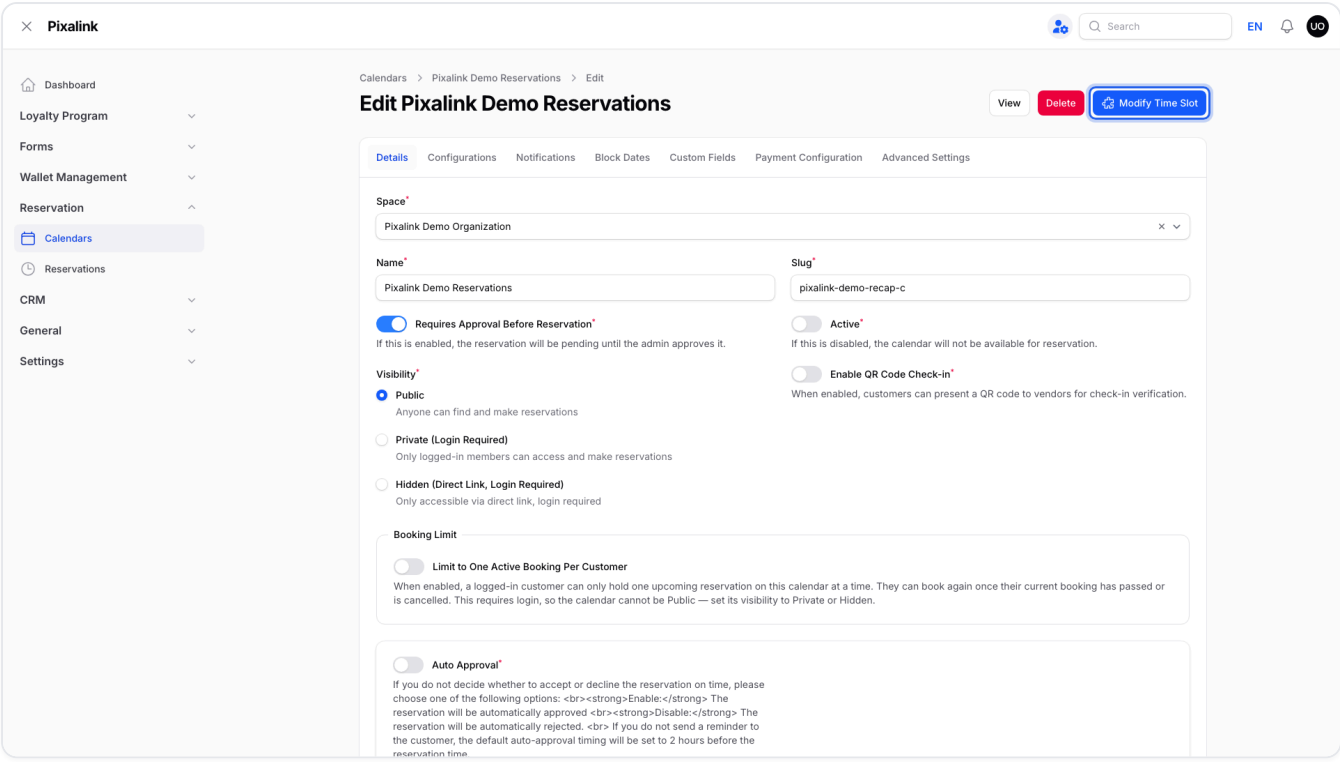

How to Set It Up

1. Go to **Admin Panel → Reservation → Calendars** and click **Edit** on your calendar.

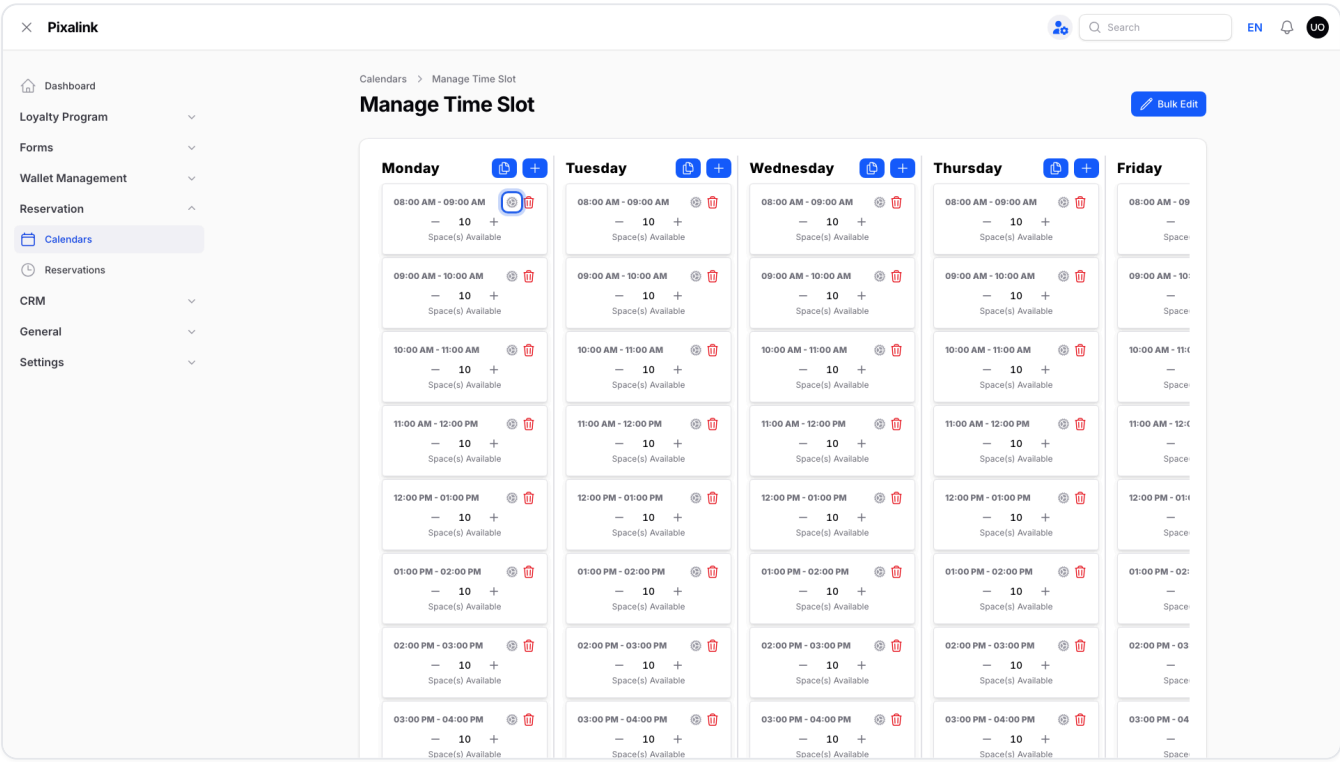

Pick the calendar that already has Require Payment on.

2. Click **Modify Time Slot** at the top right.

Your weekly timeslots open on their own page.

3. Find the busy slot and click its cog icon.

Each day has its own column. The cog opens the settings for one slot.

In the window that opens, enter a **Custom Price**, for example 50, and click **Save**. Leave **Custom Price** empty to use the calendar's **Payment Amount**. Repeat for each busy slot.

What Your Customers Will See

When a customer picks that slot, the **Pricing Breakdown** on the booking page shows the slot's price. The total they pay uses the Custom Price, not your normal **Payment Amount**.

Good to Know

- **Custom Price only shows once Require Payment is on and saved** on the calendar's **Payment Configuration** tab.
- **The price is set per weekly slot.** Thursday 4 PM costs the same every Thursday.
- **There are no automatic peak-hour or date rules.** You set each busy slot by hand. To change prices back, clear the Custom Price.

Need Help?

If the cog window has no **Custom Price** field, the calendar doesn't take payment yet. Turn on **Require Payment** on the **Payment Configuration** tab and save first. See How to Set Up Payment for Calendar Reservations (https://kb.pixalink.io/articles/how-to-set-up-payment-for-calendar-reservations).
